INTRODUCTION

BATOK Offshore and Oil Services Nigeria Limited is an indigenous Marine Maintenance Engineering Company. We specialize in the inspection, maintenance, assembly and testing of offshore crude oil loading facilities. We are experts in offshore loading system maintenance and installation, general topside inspection and maintenance of SBM.

BATOK partners with her client's asset managers to develop effective inspection and maintenance strategies that provide technical integrity assurance and high availability of the offshore crude oil export loading systems. We also provide marine support services and manning of vessels with qualified professionals.

The company has an administrative office located in Port Harcourt, Rivers state. However, by nature of the services and at clients request, resources are mobilized to clients base. Our HSE performance is top quartile with effective HSE Management system implemented as a culture across the line from Top to Bottom. The safety of our workforce and client's assets are always integral to the project delivery plan and performance target. Incident free project delivery is a key performance target set for all project team members.

BATOK has a QA/QC team comprising of experienced personnel and coordinated by the HSSE/QA/QC manager with over 18 years experience in offshore facility inspection/maintenance. To ensure quality of her work processes, well documented guidelines and steps are deployed to guide the field workers in the job execution.

These team visits the work site at pre-planned intervals to ensure that work is done according to the applicable standards. Regular training of the workforce both old and new maintenance and office based staff are embarked upon annually and when necessitated by new requirements.

We have a strong drive and commitment to success. At Batok we believe we can make a difference. We have the focus, the energy and the man power to give you the business edge.

We Think Of Safety First: Safety Is Our Watchword. At Batok our goal is to take safety to the OGPs.

We Stand For Quality And Excellence . . . We give all our best to all we do. (Even our clients have this to say about us.)

We are registered and certified under the NIPLEX JQS Scheme.

VISION STATEMENT

Our Vision in BATOK is to become a reputable indigenous company synonymous with first class service delivery in the offshore, topside facilities inspection, maintenance and equipment/material procurement and supplies.

MISSION STATEMENT:

To always satisfy our clients in terms of safety, top quartile quality and cost effective service delivery. We track your maintenance history and always on hand to reduce your key equipment unavailability and consequential production shutdown.

BONGA 2017 (TAM) BATOK EXECUTION TEAM ON THE PROJECT.

OUR SERVICES:

- SPM Topside Maintenance (Export Hoses, Butterfly valve inspection and Change out, Mooring Hawser inspection and Change out)
- Provision of Marine Logistics Services
- Supply of Marine Onshore/Offshore oil tools and Materials.
- Provision of Technical Manpower (Vessel Crewing, Pilot and Mooring Crew) in the Marine Offshore Services.
- Vessel Procurement And End User Inspection Services.
- Oil Company Waste Control :Offshore Platform/Inshore
- Floating Hoses String assembly/Installation and Inspection, maintenance and repairs /Integrity Test.
- Blasting and Painting.
- Crude Oil Tank Cleaning By WARSARH-Maritime-SouthHapton -UK trained personnel.
- Hot tapping subsea and offshore Pipeline repairs.
- Rope Access Inspection
- Welding and Fabrication

Bonga SBM Central Pipe Swivel Replacement

Picking up hose string to connect to tanker export manifold

Export hose string connected to export tanker manifold

Floating Hose Connection

Installation of Mooring Hawser to FPSO Front PUFFIN

Hightech Coupling Swivel Joint FPSO

Floating Hose Installation to FPSO

Crude Oil Back- Flushing From Hose Line With The Help Of Non Returned Valve

Floating Hose Back Flush Completed

KEY PERSONNEL PROFILE

A. OLAGUNJU KAYODE ADEBAYO

He is the Managing Director of BATOK OFFSHORE AND OIL SERVICES NIGERIA LTD. Kayode has an enviable training overseas at Lowestoft college center for maritime and offshore technology in the UK, Northwest Kent College, seas training centre, UK, Warsash Maritime Academy Southampton. He has over 21 years experience in SBM Maintenance and other marine related technical maintenance in various oilfields (Shell Nigeria FPSO Sea Eagle, FPSO Bonga Bonny Oil & Gas Terminal, Forcados Terminal), Transocean Nigeria Ltd. Seacor Marine Nigeria Ltd. Travel London Ltd, Ashtead Plant London Company Ltd. International Oilfield services Nig. Ltd, Alusteel Interoil & Dickson GMP JV USA, Chevron Nig. Ltd.

TRAINING

- Floating Hose Integrity test training in Yokohama Training School Rubber Co. Ltd., Hiratsuka Plant, Tokyo Japan from 20th-24th October 2010.
 - A. Hose bending test.
 - B. Hose burst test.
 - C. Hydrostatic Test.
 - D. Vacuum Test.
 - E. Electric Continuity Test.
 - F. Tensile Test.
- Blue Water Netherlands, Onshore facilities/Offshore, SPM Top Side Maintenance and FHS Maintenance Training Course.
- MEDICAL CARE ON BOARD SHIP COURSE (UK)
- Diving Familiarization
National Hyperbaric Center of Diving Excellence
Aberdeen, Scotland
- OGP Client Worksite Representative KBA Training Center PTE Ltd
No 26 Changi North Crescent Singapore 499637

Camlock 2 Weeks Maintenance

Damage Hose

Connecting 200 Heavy Duty Mooring Grommet Shackle to Mooring Grommet Thimble

WORK EXPERIENCE

1. **Shell Petroleum Development Company of Nigeria Ltd.**
SPMs maintenance/Mooring Hawser/(FHS) Export Hose at FPSO Sea Eagle, FPSO Bonga, Bonny Oil and Gas Terminal, Forcados Terminal.
2. **International Oilfield Services Ltd**
SBM Maintenance onboard IOSL Discovery DSV (December 1998-2002)
Position: Third engineer onboard IOSL Discovery.
SBM Maintenance top side/underwater
3. **Dickson JV Alusteel USA GMP**
SBM Installation at ELF Field Cameron (SBM Crude oil flushing, floating pipe insulation (loading), SBM Pressure testing for leakage, mooring rope installation to SBM).
4. Platform Upgrade and commissioning (crude oil flushing of turbine pump and pipe pressure test for leakage) for Esongo Platform Texaco Oilfield Soyo, Angola.
5. **Ashland Oilfield Nig. West Africa**
Platform refurbishment /4 inch under water pipeline and commissioning (crude oil and gas flushing, changing of manifold gasket and valves) at Edanga Platform.
6. **Chevron Nigeria Ltd.**
6 inch under water pipeline from star/well head to Okaan Platform, and pressure testing. 1997 April.

Hose Coupling and Bolts

Hightech Coupling Swivel Joint FPSO
Dismantle and Assembling

Hose Rack Storage Installation And Hose Alinging

Hang-Off; Pick-up Chain Integrity Inspect on

Mooring Grommet pre-installation Line-up

B. MOYO SALVADO

An enthusiastic Project Engineer with a solid background in Subsea Engineering and valuable experience as a Pipeline Engineer with one of the global leaders in subsea engineering in the Oil and Gas industry. Worked with a variety of engineering software packages relevant to the design of engineering structures and flow assurance.

Moyo has an MSc in Subsea Engineering from the University of Aberdeen, UK and a Bachelor Degree in Metallurgical and Materials Engineering in the University of Lagos

C. ADEWALE GBENGA STEPHEN

He has amassed over 15 years experience in SBM maintenance as an offshore Rigger at the SPDC West Marine Maintenance sections. Tanker mooring crew; Level 3 UK Rigger certificate.

D. NNAH SUNDAY UDOKA

Sunday is a highly technical staff with over 17 years experience as a rigger fitter. He has experience in SBM maintenance in SNEPCO Field (FPSO Sea Eagle), SPDC, Shell Bonny Terminal as Scaffolder/Fitter). Tanker mooring crew.

E. OWUYE BETHEL

Bethel is a highly technical staff with over 14 years experience as a rigger fitter. He has experience in SBM maintenance in SNEPCO Field (FPSO Sea Eagle), SPDC, Shell Bonny Terminal as Scaffolder/Fitter).

F. ELIJAH EMMANUEL

Elijah is a highly technical staff with over 10 years experience as a rigger fitter and painter. He has experience in SBM maintenance in SNEPCO Field (FPSO Sea Eagle), SPDC, Shell Bonny Terminal as Scaffolder/fitter).

PAST EXPERIENCE

BATOK OFFSHORE AND OIL SERVICES NIGERIA LTD, though a recently incorporated company has in its team a crop of technical manpower who have been directly involved with the Marine maintenance activities in upstream oil industries.

Project that have been handled include:

- 1. SEA EAGLE FPSO (SPDC)**
 - A Sea eagle SYMP pendulum intervention project (2014-2015)
Connection of FPSO mooring static tow to AHT vessel.
Disconnection of FPSO mooring static tow to AHT vessel .
Connection of mooring stretcher rope from FPSO to SYMP yolk.
Disconnection of mooring stretcher rope from FPSO to SYMP yolk.
 - B Maintenance on the export hose string (2015)
Back flush of the FHS.
Disconnection of the floating hose string from the FPSO.
Replacement of due 1st off FPSO, 2nd,3rd and tanker rail hose.
Installation of the FHS back to the sea eagle FPSO.
Pressure test.
Commission.
- 2. FOLAWIYO AJE SERVICES LTD. (2016)**
 - A Export hose assembly and pressure testing at ladol jetty lagos.
Export hose towing from ladol jetty to aje field .
Export hose installation to front puffin FPSO and pressure testing.
Mooring hawser assembly and installation to front puffin FPSO .
Mooring hawser pull test.
 - B Tanker- off take mooring project .
Mooring masters provision.
Export hose men provision.
- 3. BONGA FPSO SBM(SNEPCo)**
 - A Turn Around Maintenance (2017)
Support Imodco during installation of SBM solar cells panel, expansion piece service, central pipe swivel, floating Hose spool piece and overboard spool.
 - B. Turn around maintenance (2017)
Back flush of the FHS
Disconnection of the entry floating hose string from the SPM
Replacement of the FHS back to the SPM
Installation of the FHS back to the SPM
Pressure Test
Commission
 - C Damage hose change out (2016)
Back flush of the FHS
Disconnection of the entry floating hose string from the SPM
Replacement of the FHS back to the SPM
Installation of the FHS back to the SPM
Pressure Test
Commission
 - D Grommet DIS-ENTANGLEMENT AND REPLACEMENT INTERVENTION PROJECT (2015)
BUILDING UP NEW PICK-UP LINE ARRANGEMENT FOR TANKER OFF-TAKE

SBM main bearing grease Inspection

SBM Navigation Light

Stretcher Connection During Sea Eagle Symp Pendulum Intervention Project.
