

Batok Offshore Operational Team

VISION STATEMENT

Our Vision in BATOK is to become a reputable indigenous company synonymous with first class service delivery in the offshore, topside facilities inspection, maintenance and equipment/materials procurement and supplies.

MISSION STATEMENT

To always satisfy our clients in terms of safety, top quartile quality and cost effective service delivery. We track your maintenance history and always on hand to reduce your key equipment unavailability and consequential production shutdown.

STRENGTH

BATOK has the ability to provide turnkey solution to suit the end user's specific requirements for either long term contracts or short term projects.

CORPORATE RESPONSIBILITY

BATOK's responsibility extends not only to our own personnel but to our customers, suppliers, stake holders and environment.

Our number one priority is to the safety of operations, and that of the personnel involved with the delivery.

Safety is managed by the implementation of an over-arching safety and Assurance plan, with Risk Assessments and verification.

INTRODUCTION

BATOK OFFSHORE AN ISO 9001:2015 CERTIFIED COMPANY

BATOK Offshore and Oil Services Nigeria (**BATOK**) is a 100% Nigerian indigenous Company in Marine Services sector with over twenty years of combined experience in various fields within the Oil and Gas sector.

The head office of **BATOK** is in Port Harcourt where it also has a workshop and yard that can execute multiple types of work of varying complexity and support services required.

BATOK has the capability to provide wide range marine services, from supply of all types of vessels, mooring masters and pilots, through to supply, installation and testing of floating hoses, surface swimming diver, engineering, NDT inspection, tubular maintenance and the fabrication, installation and operations and maintenance of SPM Buoys and all aspects of marine equipment supply.

At **BATOK**, quality and safety are the main lifelines of the company and thus employs only highly skilled and experienced professionals, specialized in the respective fields and having the required domain expertise. **BATOK** has specialised in Terminal Operations for heavy lift, break bulk, general cargo and containers including Roll-On and Roll-Off operations on barges with utilization of multi wheels modules.

The following are our major activities:

- Maintenance and Operations of Floating Hoses
 - SPM Topside maintenance (Hoses, Values, Mooring Hawser, and changeouts)
 - Provision of Marine Logistics Services
 - Pilotage operations
 - Towage
 - Berthing/ mooring of vessels
 - Stevedoring
 - Cargo Handling (Heavy lift, general cargo, break bulk and container)
 - HSE Services (Fire Fighting, prevention and control of Marine incidence and pollution, waste management)
 - Security Services (ISPS code compliance, port security, escort services)
 - Vessel Supply and End User Inspection
 - Provision of Technical Manpower In Oil And Gas Up Stream
 - Hot Tap (subsea & surface) and Offshore Pipeline Repairs
 - Crude Oil tank Cleaning

1.1 *Corporate Responsibility*

BATOK's responsibility extends beyond our own personnel to include our customers, suppliers, stakeholders and the environment.

Our number one priority is accorded to the safety of operations and personnel coupled with timely delivery. Safety is managed by the implementation of an over-arching Safety and Assurance plan, with Risk Assessments and verification.

1.2 Occupational Health and Safety

Our Policy is to ensure that BATOK's Occupational Health and Safety procedures continually develop to protect the People, Environment, Assets and Reputation while carrying out operations, placing safety at the forefront always irrespective of whatever the environment or geographic location is.

BATOK works to OHSAS 18001:2007 standard for Health and Safety.

BATOK has a dedicated Health, Safety and Environment department supported by an experienced Marine Management team, continually developing and improving our safety management systems. This enables us to constantly review our safety procedures and take any legislative requirements into account to ensure that operations are carried out to highest standards, anywhere in the world. Because these independent departments operate within our organisation, we are proud to boast that our safety record is second to none.

For every site, a site specific HSE Plan will be developed to capture all the potential risks foreseen and such specific plan is designed to provide assurance in the implementation of the BATOK Offshore & oil Services Nigeria Limited Health, Safety, Security and Environmental Management Systems (HSEMS).

Furthermore, the site specific plan is like and interface to the Employers HSE Plan which will be incorporated in our HSE Plan and thus be integrated. We would prepare this in conjunction with the requirements of the Client's HSE plan and policy as required for execution of the project.

The main objective of the document is to define how BATOK Offshore & Oil Services Nig. Ltd shall manage HSE in its operations and line of business especially during mobilization, and throughout the duration of the execution of projects.

BATOK Offshore & Oil Services Nig. Ltd has detailed HSE policies and procedures, and this document bridges the relevant documents in order to clearly establish which HSE procedures are applicable. Where there is any discord in procedures, BATOK Offshore & Oil Services Nig. Ltd shall discuss and agree with the designated client's Owners/ Representatives on procedures that need to be followed.

If more information is required, BATOK will request for more reference documents and guidance from the client.

1.3 Quality Assurance

BATOK is committed to complying with and continually improving the effectiveness of its quality management system. In so doing, the company complies with relevant statutory and safety requirements, ensuring that its staff are competent to perform their duties, and that the infrastructure and work environment are appropriate.

BATOK works to ISO 9001:2015 standard for Quality Assurance and Management.

As part of BATOK improvement plan during the contract lifespan, BATOK will undertake to perform the following below:

- Deploy qualified and experienced crew for the operation
- Planned Safety Induction Training for work Crew Members
- Perform all necessary Audits, Inspection and checks for Marine vessel
- Use proper and approved work method/ procedure that meet International Best Practices
- Ensure that SPM buoys are transported on water with an approved Marine Warranty Survey (MWS)

Key Performance Indicators will be set and monitored within the following main areas -

- § Health and Safety
- § Environmental
- § Security
- § Quality
- § Service Delivery
- § Training
- § Operations

1.4 Environmental Responsibility

We undertake to not only implement measures which prevent pollution, but also continually improve our environmental performance, whilst also making aware and encouraging all parties associated with the company to consider how they affect the environment.

We comply with all environmental laws and other regulations applicable to this work.

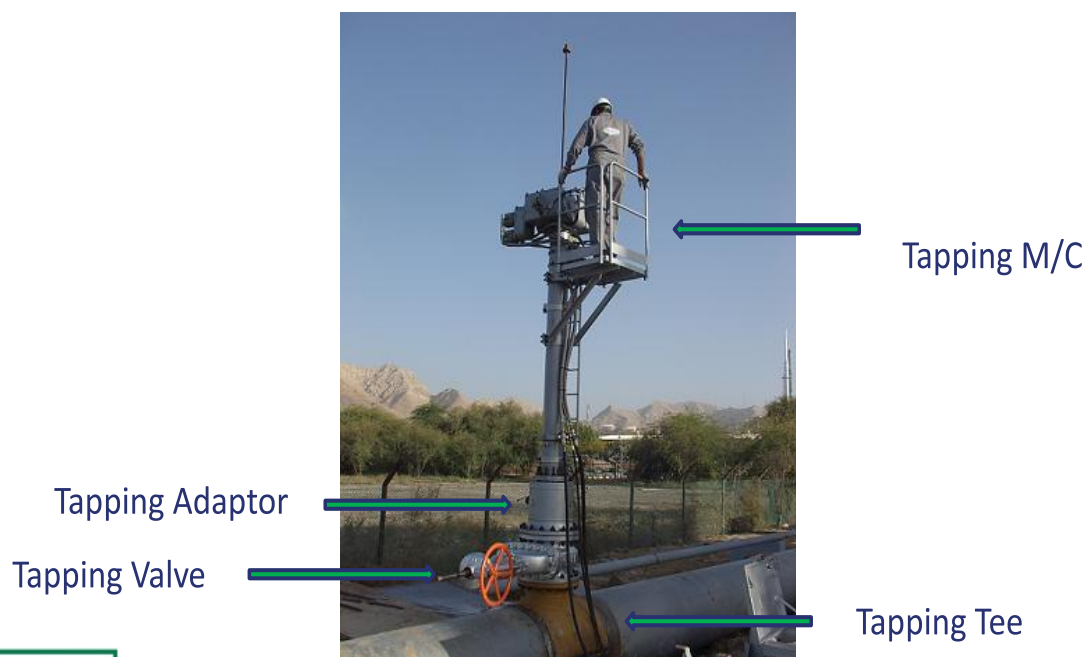

Our objectives are reviewed and re-aligned in the light of stakeholder feedback, periodic audits and reviews of our environmental management system.
